# Vertical Injection Molding Machines

---

## Injection Molding Molds

---

## Auxilliaries

## COMPANY PROFILE

We at Swift Auxi Technik Pvt. Ltd. are laser-focused on bringing high quality production ready vertical injection molding machines to our customers.

Started in early 1990's we were masters of machining and providing mechanical solutions to many leading companies in INDIA, and with new age brought around new innovation and new direction for us, in early 2010 we shifted from machining, to manufacturing of injection molding machine auxiliaries, adding to that in 2015 we started manufacturing of Vertical Injection Molding machines entering the market with the best in class vertical injection molding machines.

We take great pride in our manufacturing process and materials used in the manufacturing of our machines.

Our experience of 30+ years of engineering and 10+ years of machine manufacturing has us aiming for only the best, we aim to achieve the best in terms of technology and machine manufacturing that the world has to offer.

This allows us to provide our customers with a great after-sales experience and the highest support from our end.

We wish to provide our customers with an experience that answers all your injection molding related questions.

Fast forward to 2021, in just 3 years from our first machine we now have 100+ operational machines all over the world.

We take pride in our engineering and skill and it has been proven over the years as we have only 1.4% machine breakdown ratio, thanks to our excellent support team.

# COMPANY TIMELINE

1990

## Started Operations

Beginning company operations in early 1990's, starting with component machining and engineering solutions.

2005

## New Production Plant

Increasing production capacity we shifted to new production facilities with newer machines and with aim at improving our workmanship.

2010

## Developing Auxilliaries

In early 2010's we started developing and innovating with Injection molding auxiliaries and manufactured first batch of Auxilliaries.

2015

## Developing Machines

We started development of Vertical Injection Molding Machines In INDIA, with an aim of manufacturing best in class machines.

2016

## Manufacturing Machines

We manufactured our first 10 machines and delivered them to customers all over INDIA within 1 year of starting development, these machines are still operational with original customers even after all these years.

2018

### Developing New Gen Machines

With our customers satisfied, we started working on newer generation of machines targetting better efficiency, Precision and higher production capacity.

2020

### Developed 3rd Gen Machines

We decided to completly overhaul our machines electrical components, to achieve better precision and higher durability, to make sure that our customers can increase their production capacity. we also introduced Newer saftey features with our machines.

2021

### Inhouse Mold Manufacturing

Early 2021 we started In house mold manufacturing with an aim at providing high quality molds and taking one step closer toward our aim of complete Molding solutions.

2021

### First Milestone Achieved

100+ Machines Delivered And Operational, all over the world.

2022

### Upcoming

By the end of 2022 we wish to expand our manufacturing capacity by 5 times and to introduce our customers to our new direction of providing complete injection molding solutions and product development solutions.

## Want Hands On Experience ?

Visit us at our production plant during working hours and we'll be happy to help you with your requests and help you in your adventure with all our might.

## We are here to help.

Require help with your molding problems?

We are here to help you out, with our experience in machine manufacturing, production molding, mold designing, we are always available to help our customers with any and all molding solutions

## Having questions ?

Reach out to us at [www.swiftauxi.com/contact](http://www.swiftauxi.com/contact) and we will be happy to assist you with all your questions

# MEET THE TEAM

# MISSION

Our mission is to design and manufacture the best in world machines and Innovations that help our customers.

We wish to provide complete injection molding and product development solutions to our customers in all categories by the end on 2025.

# VISSION

Our vision is to provide complete Injection molding solutions and best in class service experience to our customers

# VALUES

Our values are cultivated to provide what we promise, we take pride in our honesty and our Engineering province.

# CUSTOMER TESTAMENT

We do not take customer testaments the  
conventional ways

---

We belive in direct communication and up-  
front addressal.

---

Want to know what our customers think of us  
and our machines, ask us and we shall put you  
directly in contact with our customers and you  
can ask them all about our machines and our  
support.
